Yash Akhauri

Blog | GitHub | LinkedIn | akhauri.yash@gmail.com | +91 78915 12802

EDUCATION

BITS PILANI | B.E. in Electronics and Instrumentation
Aug 2016 - May 2020 | RJ, India
Fluent: Python3, PyTorch, Mathematica
Familiar: C++, Java, CUDA, OpenMP, Tensorflow, Android Studio, LibGDX, Docker

EXPERIENCE

INTEL | Research Scientist
Jun 2020 | Bengaluru, IN

- Research Scientist at the Cloud Systems Research (CSR) Lab in the Systems and Software Research (SSR) Group.

XILINX RESEARCH | Visiting Researcher
Aug 2019 - May 2020 | Dublin, Ireland

- Developed a library for co-design of neural network topologies and reconfigurable hardware that maps to an efficient FPGA implementation without the need for a custom accelerator architecture or a scheduler.
- Targeted the Jet Substructure Classification task as part of CERN LMS L1 trigger experiments, used the library to deploy models with $10\times$ lower latency than FPGA4HEP designs.Demonstrated quantization library Brevitas to CERN `[GitHub]`.

URANIOM | Research Intern
Jan 2019 - Jul 2019 | France (Remote)

- Implementing semantic segmentation models for face transfer across GIFs, progressive GANs for realistic UV map generation and exploring effective weight-sharing strategies for neural networks under a research collaboration.

WOLFRAM | Undergraduate Researcher
June 2018 - July 2018 | Waltham, Massachusetts

- Developed HadaNet MLPs in the Wolfram Language and worked on C OpenMP kernels for GEMM and Convolutions using the Hadamard Binarization algorithm. `[OpenMP kernel]` | `[CUDA kernel]` | `[Whitepaper]`

PAPERS & GRANTS

LogicNet: Constructing Neural Networks from Truth Tables — Arkansas | May 2020
Paper accepted at **FCCM'20** as a poster presentation.

HadaNets: Flexible Quantization Strategies for Neural Networks [Link] — California | Jun 2019
Paper accepted at **CVPR'19 UAVision workshop - Orals** .
Delivered a "Theatre Talk" and poster at the Intel Demo Booth at CVPR'19.

Wolfram Technology Conference – Speaker — Champaign, IL | Oct. 2018
Delivered a talk on my research on Hadamard Neural Networks.

Intel Nervana Early Innovators Grant — $5000
Received research grant to develop Binary Precision Neural Networks and Real time Artistic Style Transfer. The technical article can be found `[here.]` The code can be found `[here.]`

Intel CVPR Travel Grant — $3000

Wolfram Student Aid — $2400
Received aid to attend the Wolfram Summer School and develop Hadamard Binary Neural Networks.

Intel AI Meetup – Speaker `[pptx]` `[Article]` — Delhi, IN | Sept. 2018
Spoke about my research on scaling AI using Intel technologies. This event was organized by Intel.

Intel AI DevCon – Poster — San Francisco, Bangalore | May & Aug 2018
